Ensuring the Future Today

Every manufacturing facilities biggest challenge is maintaining a steady stream of parts. BC Group has approached this challenge with continuous investment in its in-house ability to provide as much as we can without reliance on the outside world. BC Biomedical test equipment is made in St. Charles, MO, USA and so are many of the unique parts that go into those products.

BC Group Offers Multiple O2 Analyzers

The OX series Oxygen Analyzers and Oxygen Monitor are intended to measure and display Oxygen concentrations from 0-100%. The intended uses are to verify, spot check or continuously monitor Oxygen concentrations. Typical applications are for testing Oxygen/Air blenders, Oxygen Concentrators, Ventilators, Anesthesia Machines, Medical Gas testing applications, etc.

The OX-1900-A and the OX-1900-M feature advanced sensor technology with 60-month life in air, fast response (9 seconds) and no maintenance.

The OX-1800 A and the OX-1800-AR are handheld units that allow the user to choose either an internal or external sensor. These units also allow the user to replace the sensor and the battery in the field, unlike some competitive models that are disposable once the sensor or battery reaches end of life.

ESU Testing Automatically

A new PM AutoSequence for the ESU-2400 family is now available for use with Covidien FT10 generators running Software v4.0. You can find and download the update through our store and the picture above. The update can also be found at bcgroupintl.com by clicking the link, along with a variety of other sequences for your ESU product.

Infusion Pump Testing Made Easy

The IPA-3400 is a high accuracy, easy to use system that incorporates full touch screen control of all processes without the use of old fashioned buttons and knobs. This new cutting edge Patented design uses a dual syringe stepper motor driven system that provides continuous monitoring of the fluid flow without the need to stop and perform intermittent drains.
